

## Dr. Nancy Parsons-Kanter, Bio

Nancy is a Pediatric Neuropsychologist, semi-retired and working with families and children (primarily in litigation situations) around issues such as birth injuries, head injuries, and other health related areas affecting neuropsychological (brain) functioning.

Nancy has also been active in working with families with children suffering from Fetal Alcohol Spectrum Disorders for the Florida Center for Children and Families. She is also a former La Leche League leader, and active volunteer for her daughter's schools (K through 12).

Along with her husband Geoffrey, Nancy spent many summers vacationing in Boothbay Harbor, until they spent several months into the fall during the pandemic, and eventually deciding to move permanently, year-round, from Sarasota FL to the midcoast.

Nancy and Geoff spent a lot of time at Burnt Island over the years, enjoying the island with guests and with their dogs. Burnt Island was a very frequent destination while out kayaking or boating. Over the years they learned more about the volunteer programs offered for children, and then more about the KBIL program.

It is an honor to give back to the Island as a board member of KBIL today.
